

Grooved reducing tee wye

Grooved reducing tee wye is a reducer inclined three-way pipe fitting. The branch interface is inclined at a certain Angle to the main pipeline and has a different pipe diameter. It is used to achieve the inclined branch connection of the reducer pipeline and facilitate the smooth transition of the fluid.

- Standard:** ANSI / UL 213C FM
- Material:** Ductile iron ASTM A536, 65-45-12
- Rated pressure:** 300 - 500 psi
- Surface:** Black / red painting / hot dip galvanized
- Size range:** 4"×4"×2-1/2"

Available size

Size			Center to end(mm)	
Inch	DN	mm	L1	L2
4" × 4" × 2-1/2"	100 × 100 × 65	114.3 × 114.3 × 76.1	96	134.5
