

Grooved straight cross (Equal cross)

Grooved straight cross (Equal cross) is an equal-diameter four-way pipe fitting. The four interfaces have the same pipe diameter and are vertically distributed in a cross shape, which is used to achieve cross-shaped branch connections of equal-diameter pipelines

- **Standard:** ANSI / UL 213C UL / FM
- **Material:** Ductile iron ASTM A536, 65-45-12
- **Rated pressure:** 300 - 500 psi
- **Surface:** Red painting / hot dip galvanized
- **Size range:** 1-1/4" - 12"

Available size

Size			Center to end
